

# Protecting Your Digital Life Starts Here

## For Individuals and Families

### Cyber protection made simple – for the people we care about most

With identity monitoring, 24/7 support and essential tools to protect your digital life, **Cyberboxx® Assist** empowers individuals and group members to stay one step ahead of online threats.

BOXX Insurance provides everything you need to confidently and effortlessly stay secure, so you and your household can navigate today’s cyber landscape with confidence and security.

### Cyberboxx® Assist provides you with essential cybersecurity tools and real guidance to help you stay safe online:

-  **Security Assessment**  
Spot weaknesses in your home’s digital setup and secure them before threats appear.
-  **Digital Safety Knowledge**  
Unlock essential knowledge and skills with our curated collection of cyber learning.
-  **Guided Assistance**  
Explore easy-to-follow resources to tackle cyber issues, strengthen security and resolve problems confidently.

-  **Identity Monitoring & Hacker Chatter**  
Enter an email or phone number to scan for breaches and receive instant alerts with steps to secure your ID.

-  **24/7 Hackbusters® Incident Response**  
When something goes wrong online, you shouldn’t have to figure it out alone.  
  
Our team is available around the clock to help you respond quickly to cyber incidents — containing the threat and helping you through recovery so you can get back to life, safely and stress-free.

#### PREDICT & PREVENT BETTER THAN THE REST

Cyberboxx® Assist empowers DigitalShield™ policy members to stay one step ahead of online threats.

*“Cyberboxx® Assist’s identity monitoring tool alerted me that my email was compromised. Their dedicated specialist guided me step by step to restore my accounts and protect my personal information. Now, I feel confident knowing my cyber health is in expert hands.”*

## Cyber threats are growing – don’t face them alone

Even households with minimal online activity can be exposed to digital threats, making personal cybersecurity essential in today’s connected world. Here are some common threats we investigate and continuously monitor for:

### Phishing Scams

Fraudulent emails or messages that trick individuals into revealing sensitive information.

### Ransomware

Malicious software that locks personal files until a ransom is paid.

### Identity Theft

Unauthorized use of personal information for financial or criminal purposes.

### Social Engineering

Manipulating to gain access to sensitive data or alter invoice details and payment instructions.

### Password Hacking

Unauthorized access to accounts by cracking weak or reused passwords.

### Spyware

Malicious software that secretly monitors online activity or captures sensitive data.

### Malware

Viruses, worms or trojans infect devices to steal, damage or control information.

### Social Media Attacks

Impersonation or account hacking to exploit personal contacts or data.

### Wi-Fi Eavesdropping

Intercepting data transmitted over unsecured public Wi-Fi networks.
